The SyncHub board adapters migrate the following resources between ADO organizations:

- All **XML based WIT processes** for an AzDO project, including:
  - Behaviors
  - Fields
  - Layouts
  - Metadata for Picklists
  - Rules
  - States
  - System controls
  - Work Item types
  - Work Item type behaviors

Permissions

- **required PAT scopes**: Work Items (Read, write & manage)

Export: Sample config

Command

```
.\synchub.exe run -n "WitProcessXml-Export" -v "V1" --config C:\Temp\synchub-configs\config-witprocessxml-export.json -u alexander.hjelm@solidify.dev -p XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX --license-file C:\path\to\license-file.json
```

Configuration

```
{
    "configuration":
    {
      "source": "https://dev.azure.com/solidifydemo",
      "ProjectName": "ContosoAir",
      "target": "C:\\Temp\\Workspace",
      "apiVersion": "6.0-preview.1"
    }
}
```

Import: Sample config

Command

```
.\synchub.exe run -n "WitProcessXml-Import" -v "V1" --config C:\Temp\synchub-configs\config-witprocessxml-import.json -u alexander.hjelm@solidify.dev -p XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX --license-file C:\path\to\license-file.json
```

Configuration

```
{
    "target": "https://dev.azure.com/solidifydemo",
    "SourceFilePath": "C:\\Temp\\Workspace",
    "targetProject": "ContosoAirNew",
    "apiVersion": "6.0-preview.1"
  }
```
